

Title

Love Of My Py

Description

Life is short, so we need Python. There are bits and words of why Python is good, however, it is still fascinating to put them all together and learn about what makes Python it is today and how to embrace its future. Not everyone works as developer or programmer for life, but many, if not all, will benefit a lot "integrating" Python in life. In this talk, we will try to figure out "why Python Zen is everywhere", and "how we are enlightened".

Abstract

- * Life = Py
- * Language Is a Tool, Not a Problem
- * What's Your First Language? (Lucky, Fortunate, God Bless You)
- * Evolutionary Trees with Dead-ends Branching
- * Programs Are Read More Than They Are Written
- * Most Things in Java Require Me to Look Something Up
- * Backward Compatible?
- * Vocabulary, Sentence, Idiom, Pattern, Concept
- * What You Speak Is What You Think
- * Someone "Saying Goodbye To Python"?
